In the version of this article initially published, Henn, C., & Morgan, B. (2019). Differential item functioning of the CESDR-R and GAD-7 in African and white working adults. *SA Journal of Industrial Psychology/SA Tydskrif vir Bedryfsielkunde*, 45(0), a1663. <https://doi.org/10.4102/sajip.v45i0.1663> the title of the manuscript has been incorrectly published as 'Differential item functioning of the CESDR-R and GAD-7 in African and white working adults'. The correct title wording is 'Differential item functioning of the CESD-R and GAD-7 in African and white working adults'.

On page 5 of the article, Table 1 is incorrectly displayed without the confidence intervals for the alpha and parameter estimates for the omega columns.

The correct table is presented below:

TABLE 1: Descriptive statistics and reliability coefficients for the Centre for Epidemiological Depression Scale Revised and Generalised Anxiety Disorder 7 scale scores across African and white participants.

Participants	Mean	Mdn.	SD	Skew.	Kurt.	SE	α	Confidence intervals	ω	Parameter estimates	β
CESD-R African	15.37	11.00	14.33	1.27	1.17	0.82	0.94	0.92, 0.95	0.94	0.92, 0.95	0.69
CESD-R white	14.04	10.00	14.29	1.87	3.90	0.92	0.95	0.93, 0.96	0.95	0.93, 0.96	0.80
GAD-7 African	5.91	4.00	5.34	0.89	-0.09	0.31	0.91	0.89, 0.93	0.91	0.89, 0.93	0.86
GAD-7 white	6.28	5.00	5.31	0.89	-0.06	0.35	0.93	0.92, 0.95	0.93	0.92, 0.95	0.85

Note: 95% bootstrapped confidence intervals for coefficient α and ω . CESD-R African: $n = 307$; CESD-R white: $n = 244$; GAD-7 African: $n = 304$; GAD-7 white: $n = 225$.

CESD-R, Centre for Epidemiological Depression Scale Revised; GAD-7, Generalised Anxiety Disorder 7-item Scale; SD, standard deviation; SE, standard error; Mdn., median; Skew., skewness; Kurt., kurtosis; β , Revelle's coefficient beta.

This correction does not alter the study's findings of significance or overall interpretation of the study's results. The publisher apologises for any inconvenience caused.
